SOLIDEAL®

SRGP L3/E3/G3

RADIAL CONSTRUCTION

SOLIDEAL RADIAL GENERAL PURPOSE

Full Steel European RADIAL Design

Extended life:

- Advanced design and rubber compound
- Optimised sea/land ratio
- Deep lugs

Excellent traction and stability

Great riding comfort

- Patented tread design to minimize vibrations
- Optimized carcass capable to take appropriate deformation

Non directional tread design

- Provides the same great traction moving forward and backward

Exceptional self cleaning

OD = Outside Diameter SW = Section Width OTD = Original Tread Depth

Dual Star */**®:

SOLIDEAL® Rating System for Radial tires which means that the tires are rated 1* AND 2*

- makes it easier to match tires to applications
- reduces inventory complexity

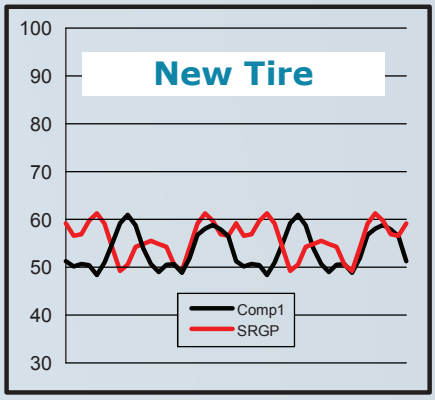

Available compounds:

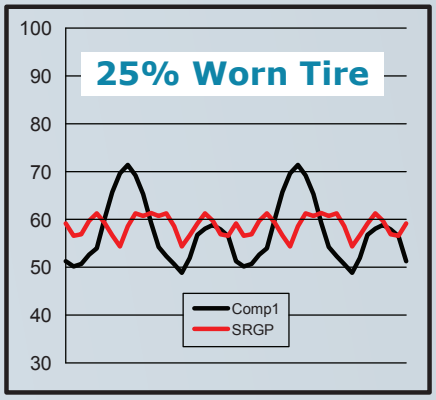

- Standard
- Cut resistant

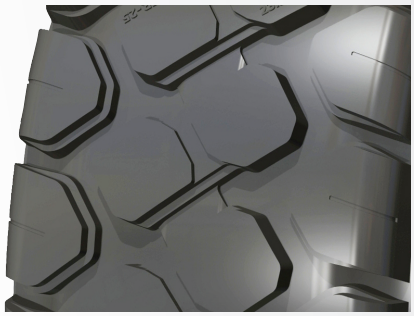

Patented tread design to minimize vibrations:

The level of vibration of **SOLIDEAL®** SRGP already outperforms competition on new tires.

When the tire wears down, while vibration levels increase on standard radial tires, **SOLIDEAL®** SRGP even IMPROVES its performance and obtains further reduced vibration levels.

Excellent traction and stability

- Optimal lug angle and flat tread

Patented tread design to minimize vibrations

- Optimized distribution of its centre and lateral lugs

Exceptional self cleaning

- Unique Solideal two-stepped tread lug which provides exceptional tread self cleaning by breaking the mud and ejecting the stones
